8 months 20-25 cm plant size

# Cultivation stage (grower)

16 months (production 50%)

20 months (production 100%)

#### Unlimited in varieties, offering unlimited possibilities

#### A story of innovative entrepreneurs and pragmatic experts...

Anthura is the expert in breeding and propagating Orchids and Anthurium. Over the last 80 years, our family company has developed into a worldwide market leader. After years of focusing on innovative and sustainable product development, we have created an unparalleled selection of colourful varieties.

As a breeder, Anthura shows that entrepreneurship is about more than just streamlined delivery of high quality plant material. We do not only innovate by deploying the most modern technologies, but also by entering into win-win partnerships.

#### ...who are focused on connection, thriving chains...

We focus on a promising future for our customers, and also on the optimum performance of the chain. We are constantly curious about the ideal product characteristics and applications for the entire chain; for instance, by evaluating new forms of marketing and developments in online and offline opportunities ad possibilities.

#### ...and the success of others.

For all our customers around the world, we are the number one partner that will make them most successful.

## Sustainable entrepreneurship is in our DNA

Anthura is a company of innovation-minded entrepreneurs and pragmatic experts. We are an innovative organization that not only seeks continuous quality improvement and versatile variety characteristics, but also focuses on sustainable production processes and products.

#### YLB Young Leaf Breaking

Young Leaf Breaking is removing young leaves by first appearance in the cultivation and preserving just two mature leaves per plant in order to increase the flower production in comparison to the traditional process.

#### Disclaimer

The information in this brochure is based on results obtained from trials carried out on test locations of Anthura. Even though this brochure is compiled with great effort, Anthura B.V. cannot be held responsible for any inaccuracies, given advice and/or incomplete information obtained in this brochure. © Anthura B.V.

In practice the obake varieties can be different from the pictures in this overview because of growing conditions.

Antique: it is possible to harvest this variety 4 weeks later than normal in order to get a special colour.

#### Notifications

Anthura varieties are protected by plant variety rights and/or US plant patent.
