

Phalaenopsis catalogue

2020 / 2021

Introduction

Anthura is the expert in breeding and propagation of Anthurium and Phalaenopsis. We are known for our innovative growing solutions, and leading range of strong Phalaenopsis varieties. Every day, we challenge ourselves to develop new varieties, new colours and new shapes.

Unlimited in Varieties, offering Unlimited Possibilities

Anthura is the worldwide specialist in Anthurium and Orchids. With our extensive knowledge of genetics and young plants, we provide growers with everything they need for a sustainable and profitable chain.

As a breeder and propagator, we are constantly working on the development of new techniques to achieve these goals. In addition, we stimulate entrepreneurship, make the chain more sustainable and cooperate internationally. This vision is applied to our locations in the Netherlands, Germany, North-Macedonia and China.

Our Research & Development department has sequenced and mapped the DNA of Orchids and Anthurium in 2018. A unique milestone in horticulture. We have now invested in the infrastructure, technology and people to translate this breakthrough into a more sustainable production

of Anthuriums and Orchids, an increase of your return on investment, and to fulfil the needs of other chain partners and consumer preferences worldwide.

Years of focus on innovative and sustainable product development have resulted in an unlimited assortment of strong and colourful varieties with a long flowering period.

Pioneering for success together with you is a huge motivator. Together we develop a strategy to make you our primary focus in the market.

Hundreds of growers in professional horticulture grow our colourful varieties, allowing millions of consumers to enjoy beautiful plants and flowers.

Sustainable entrepreneurship is in our DNA

We continuously strive to make innovative improvements in our production processes. We are committed to reducing our environmental impact through the development of varieties that can be produced with less energy and fewer water and plant protection products due to built-in resistances and improved product properties.

‘Sustainability is a cornerstone of our mission’

However, it goes further than this.

Due to an intrinsic drive we are dedicated, on both national as international level, to several projects in the field of biodiversity and other sustainable development goals.

Sustainability is high on our agenda.

This is also recognized outside the company by the fact that we have won the Plantum Sustainability Award, the Horticultural Business Award (2019) and we were the Gold Rose winner at the International Grower of the Year Awards as well as the winner in the category ‘sustainability’ (2020).

CupGrade

The new standard in Phalaenopsis

- ✓ Less labour
- ✓ Less transport
- ✓ Less waste

watch our
CupGrade
video

15
plants

60-90
plants

CupGrade is the new standard in the production of Phalaenopsis worldwide. Today's tissue culture plants are supplied in small round plastic cups. From now on, Anthura will supply tissue culture plants in CupGrade: plants will be taken out, cleaned of agar, graded and packed under sterile conditions. A CupGrade container contains many more plants.

CupGrade offers a lot of benefits: it is more sustainable in several ways..

The benefits are listed below:

- As plants are already graded and cleaned of agar, planting can start straight away, thus reducing labour costs by up to 50%;
- A CupGrade container contains many more plants. During transport the load factor will at least be doubled;
- Plants can be stored for at least two weeks in temperature-controlled storage;
- The plants are agar-free, which means a cleaner and more hygienic environment;
- Reduced packing material waste.

Storage

CupGrade plants can be stored for at least two weeks in temperature-controlled storage thanks to their sterile processing. This offers the maximum flexibility when it comes to planning labour and space requirements. The optimal conditions are a temperature of 19-20°C, relative humidity of 60-70%, and dark storage.

Planning

After an intensive testing period, we are delivering the first CupGrade batches since the first quarter of 2020. Throughout the year, CupGrade will be available for all our customers provided there are no restrictions imposed on the country of origin.

Sustainability

As a CupGrade container offers much greater plant capacity, many more plants can be loaded on trucks. As the load factor is higher, this means lower transport volumes, as a result of which the CO₂ emission per plant will be lower. Also, with lower transport volumes, less plastic will be used in production processes, and the plastic that we do use is clean and recyclable. CupGrade is a much more sustainable solution.

Manta More

NEXT GENERATION ORCHIDS

mantamore.com

NEXT
GENERATION
ORCHIDS

Manta More: the next generation orchid

The Manta More series is the 'Next Generation' orchid. The lip of the Manta More is larger, which makes the appearance of the orchid impressive. It is more vigorous, more open and flatter; in short, a plant with a confident appearance. With Manta More, More Manta!

If you look closely at the flower, you can see why this series is called Manta More. The flower has a unique silhouette that evokes the graceful Manta rays! Like these tropical animals, Manta More orchids are large, voluminous and powerful, yet graceful and elegant. This is how the Manta ray moves through the oceans.

Manta More: More Power, More Open,
More Flower, More Charisma,
More Orchid!
